

Amoobi is an innovative and growing company. Its unique technology uses **3D optical sensors** to automatically analyze customers' journeys through shops.

Their aim is to become the **market leader** in retail space analysis to make shops **easier**, more **efficient** and more **enjoyable** for customers. Amoobi has an **international** presence, operating in more than 10 countries in Europe and North America. Their customers include some of the world's largest retailers and FMCG companies.

For more information, please visit their website: <https://amoobi.com/>

To ensure Amoobi's growth, we are looking for an **Angular Software Engineer (M/F)**.

# Angular Software Engineer (M/F)

## RESPONSIBILITIES

As an **Angular Software Engineer**, you will join an Agile team of 4 to develop products and tools based on innovative technologies. You will have the opportunity to contribute to cutting-edge projects that leverage your expertise in Angular development.

Your main responsibilities are:

- Contribute to all parts of the Amoobi software stack, from planning to delivery.
- Bring your creativity and new ideas to enrich our development.
- Actively participate in Amoobi's growth by shaping the company's direction.
- Collaborate closely with a dynamic R&D team in a rapidly expanding company.
- Play a key role in fostering innovation and Amoobi's ability to move quickly.
- Work on diverse technical and strategic aspects of our projects.

Your main projects are:

- Add new feature to the web application used by their clients.
- Implement an internal tool using Python to facilitate the work of other teams.
- Develop a new UI for an internal tool or a new client dashboard.

## PROFILE

- You have a Bachelor's or a Master's degree in Computer Science, Software Engineering or a related field.
- You demonstrate **2-5 years** of experience with **Angular** development.
- You are a **team player** and enjoy working in close collaboration with your colleagues.
- You have a **curious mindset** and are eager to learn about new things.
- You have some experience with **Python 3** and feel comfortable with it.
- You are able to communicate in **English** (French is a plus).
- Experience in UX design and machine learning (any framework) would be a plus.
- Practical knowledge of SQL, Linux, shell scripting or Docker would be a plus.

## OFFER

- The opportunity to join a **motivating project** within a growing organization.
- A **pleasant** and flexible working environment.
- Fun team bonding moments.
- A permanent contract with an attractive salary package based on your experience.
