

Our partner is a pioneering medical device company focused on developing **advanced imaging solutions** with the potential to revolutionize cancer surgery and improve patient care.

Their technology enables real-time cancer tissue identification, supporting immediate surgical intervention and opening new possibilities for diagnostic and therapeutic applications.

To support their ongoing growth, we are currently seeking a **Clinical Study Manager** based at headquarters in Liège, Belgium.

Clinical Study Manager

RESPONSIBILITIES

As **Clinical Study Manager**, you are responsible for the coordination of all clinical studies in Europe.

These are your responsibilities :

- You will manage **clinical studies** in Europe in collaboration with internal and external partners.
- Ensure that studies comply with GCP standards and regulatory requirements.
- **Develop and maintain** essential documents and structures for efficient study execution.
- Address site-specific requests and resolve any product-related issues.
- Secure all necessary regulatory and ethics approvals.
- Guide and train CRAs/CROs on **study protocols** and procedures.
- Oversee data collection and ensure timely entry according to study protocols.
- **Report project progress** and results regularly to your line manager.

PROFILE

- Hold a Bachelor's degree in a health-related field, with 5-10 years of experience in clinical trial management, ideally in medical devices.
- Possess knowledge of clinical research regulations.
- Demonstrate strong communication, organizational, and problem-solving skills.
- Be able to work independently, with strong attention to detail.
- Have project management skills and a customer-oriented approach.
- Be fluent in English (written and oral); French is a plus.
- Be willing to travel up to 40%

OFFER

- A stimulating and varied position within a fast-growing, **innovative medtech company**.
- Training in Switzerland to support your integration and development.
- An opportunity to contribute to the **growth of a high-potential** medtech company.
- A collaborative, dynamic, and professional work environment with international exposure and **development opportunities**.
- An attractive compensation package aligned with the role and your experience.
