Founded in 2021, **Santero Therapeutics** is an innovative Spin-off from ULB, active in the **antimicrobial resistance.** The company is anchored in more than a decade of fundamental research carried out in the labs of the Founders.

Santero Therapeutics' goal is to develop **first-in-class antimicrobials** with new mode of action. The company currently has eleven enthusiastic employees and is rapidly growing, following an 8M€ fundraising round concluded in June 2023.

Find out more about the company on their website: <a href="https://www.santero.be/">https://www.santero.be/</a>

In order to strengthen Santero Therapeutics' team based in Mont-Saint-Guibert, we are looking for a **Research Associate** (M/F).

# Research Associate (M/F)

#### **RESPONSIBILITIES**

We are looking for a highly motivated and skilled Research Assistant to join the Biology Team to work in the laboratories located in **Mont-Saint-Guibert.** As a Research Associate in **Microbiology** and Biochemistry, you will perform laboratory work to support the development of assays and the selection/validation of innovative drug candidates.

Your main responsibilities are:

- Drawing up protocols and using existing protocols to **test molecules** produced by chemists.
- Carrying out experiments in microbiology, biochemistry, and cell culture from start to finish, interpreting the results.
- Work in contact with bacterial strains and carry out various tests.
- Compile, summarize, record, and critically analyze data to present them at project team meetings.
- Participate in the maintenance and calibration of equipment.
- Draft the SOPs required to carry out the experiments.
- Be involved in managing the laboratory's stocks.
- Be part of an interdisciplinary team and actively collaborate with other scientists within the company.

## **PROFILE**

- You have a Master's degree in biotechnology or equivalent.
- You have a first laboratory experience in microbiology, preferably in a biotechnology or pharmaceutical company.
- You are familiar with safety processes in a biological laboratory. Experience with BSL2 environment would be an asset.
- You are well-organized, conscientious and have a proactive attitude.
- You are flexible and able to learn new tasks and solve problems quickly.
- You are a team player with good communication skills.
- You are fluent in French and English.
- You enjoy working in an international environment and with young, enthusiastic colleagues.
- You like the diversity of tasks and the start-up spirit.

#### **OFFER**

- An important role in the technical team of a young, innovative, and promising company.
- Working in a friendly, international, and stimulating environment.
- The opportunity to join a fast-growing, high-impact company, focusing its work on promising drug development.
- A permanent contract with an attractive salary package, in line with your experience.
