

Our partner is a pioneering medical device company focused on developing **advanced imaging solutions** with the potential to revolutionize cancer surgery and improve patient care.

Their technology enables real-time cancer tissue identification, supporting immediate surgical intervention and opening new possibilities for diagnostic and therapeutic applications.

To support their ongoing growth, we are currently seeking a **Software Engineer – Full Stack web Development** based at headquarters in Liège, Belgium.

Software Engineer – Full Stack Web Development (M/F)

RESPONSABILITIES

Reporting to the Software Architect, you will be responsible for designing and implementing the Company's medical software solutions. You will be involved in **the entire software development lifecycle**, from requirement analysis to deployment.

Your main responsibilities are:

- Collaborate daily in the product development, from the idea to the customer support.
- Design and develop the company's software solutions with the development team.
- Select appropriate tools and technologies to meet functional and technical requirements.
- Implement **Front-End (JavaScript, TypeScript, VueJS) and Back-End** features using **Java, Spring, PostgreSQL**.
- Ensure code quality through **code reviews, automated testing, and CI/CD pipelines**.
- Maintain and improve technical documentation, ensuring compliance with **ISO 13485, IEC 62304, FDA, and CE regulations**.
- Diagnose and fix software defects.
- Contribute to project planning and workload estimation.
- Participate in technical decisions and software architecture improvements.

PROFILE

- You have a Bachelor's or Master's degree in Computer Science (or equivalent) and at least **5 years of experience** in web development.
- You are proactive and collaborate effectively with developers, managers, and stakeholders.
- You **master Java and Spring for Back-End** development and **TypeScript** with a modern framework (VueJS, React, or Angular) **for the Front-End**.
- You are comfortable with relational databases (PostgreSQL, SQL).
- You work with modern tools: Docker, Git, Gitlab CI/CD, testing frameworks.
- You have a working knowledge of Linux
- You enjoy solving complex problems and working in a dynamic environment.
- You fluently communicate in **English**. French is a plus.
- You are ready to **travel** occasionally.

OFFER

- A challenging and diversified position within a **high-potential fast-growing innovative medical device company**.
- The opportunity to participate in the development of the company.
- To work in a **human size**, dynamic, respectful, and professional environment.
- A role that directly contributes to the improvement of global healthcare outcomes.
- An attractive compensation package in line with the position responsibilities and your experience.
