

Our client is an engineering firm specialized in the field of numerical simulation.

Active in several sectors, it supports its clients and partners, including major industry leaders in the Liège region, on various R&D projects. Driven by strong values, it is recognized for its expertise and responsiveness.

For one of its main clients, located in Kortrijk, we are actively looking for a Technical Drafter.

Note: The final client is located in Kortrijk.

Technical Drafter

RESPONSIBILITIES

As a Technical Drafter, you will join the Databeheer CC team and contribute to the integration of two SCADA systems. You will be responsible for digitizing network elements (electricity, gas, and sanitation) in technical drawing software, updating networks, and adapting the data model for visualization in SCADA, in collaboration with the network management team.

Responsibilities:

- **Digitize network elements** (electricity, gas, and sanitation) in technical drawing software.
- **Update networks** in existing systems and adapt the data model for SCADA integration.
- **Collaborate with the network management team** to meet deadlines and established quality standards.
- **Follow predefined work instructions** and ensure project compliance with technical standards.
- **Work closely with the SCADA teams** for the efficient integration of both SCADA systems.
- **Participate in defining technical requirements** for updating the data models.
- **Verify the accuracy of transmitted information** and ensure proper data integration into the SCADA system.
- **Meet deadlines** and report any obstacles or additional requirements in a timely manner.

PROFILE

- You have at least **2 years of experience** as a **technical drafter** in a similar environment.
- You are proficient in **PowerOn** and have a demonstrable experience of at least 2 years with this tool.
- You have knowledge or experience in the **electricity and/or gas sector**.
- You have worked within a Belgian distribution network operator and are familiar with the sector's specifics.
- You are fluent in **Dutch, French, and English**.
- You are flexible and open to occasional travel within Flanders and potentially to other company sites.

OFFER

- A diverse role with a significant impact, including responsibilities and exciting projects.
- The opportunity to join a network of passionate engineers in various cutting-edge fields, with an international scope.
- An attractive salary and extra-legal benefits, tailored to your profile and professional experience.
- The possibility of joining the company as an internal employee or working as a consultant through the partner engineering office.
- Contract Duration: 1 year (08/05/2025 - 08/05/2026), with the possibility of a 12-month extension.
- Work Arrangement: Full-time.
